JPMANN

Structural & Geotechnical Consultants

STRONG FOUNDATIONS
FOR A BETTER TOMORROW

SERVICE LIST

JPMANN.COM

About Our Services

At JPMANN, we have a dedicated and experienced team specialising in structural and foundation design for projects of all sizes. From small residential extensions to complex basement schemes and large-scale new builds, we provide practical, compliant, and cost-effective design solutions tailored to our clients' needs

Most of our work is carried out in London and the surrounding counties, although we also act for clients across the North of England, Scotland (including Inverness), Northern Ireland and the Republic of Ireland. The JP Mann team is recognised for developing innovative and effective solutions for both temporary and permanent works.

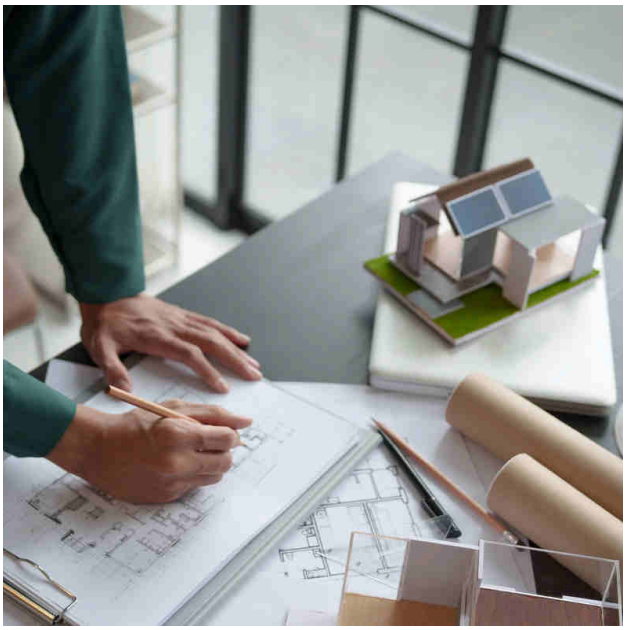

We work closely with developers, contractors, engineers and private clients to deliver practical, reliable engineering solutions tailored to the specific requirements of each project.

Structural Design Services

- Full basement design (base slabs, lining walls, capping beams, and temporary works)
- Underpinning solutions (piled underpinning and mass concrete underpinning)
- Superstructure design
- Temporary works design
- Structural steelwork
- Timber structures
- Retaining walls (piled walls, reinforced concrete walls, and masonry walls)
- Bar bending schedules
- Structural repairs
- Strip foundations and piled ground beams
- Raft slabs (piled raft slabs and ground-bearing slabs)
- Structural detailing
- Brick and block masonry retaining walls (Steppoc walls, cavity-filled gravity walls, and hollow block masonry walls)

Geotechnical Design Services

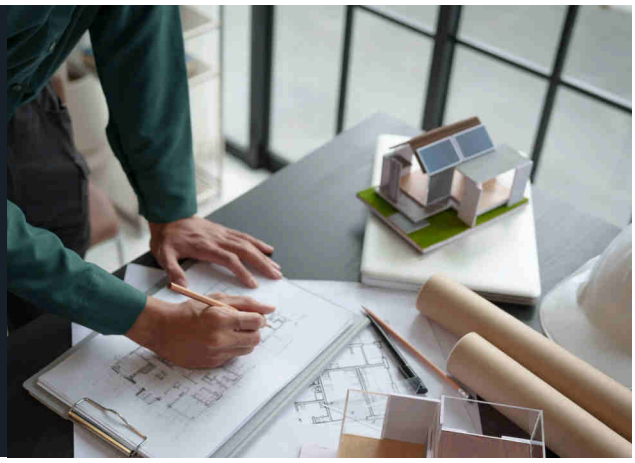

- Soil investigation report
- Basement impact assessments
- Ground movement assessments
- Ground improvement solutions (stone columns, rigid inclusions, and PVDs)
- Piled retaining walls (contiguous piles, secant piles, king post piles, and sheet piles)
- Bearing piles
- Screw piles
- Driven piles (steel cased driven piles and precast driven piles)
- Micropiles
- Soil nailing and ground anchor design
- Pile working platform design

Commercial Spotlight

Structural Engineering

In the world of construction, structural engineering plays a pivotal role in ensuring the integrity, stability and safety of buildings and other structures.

Pile Design

Piles are crucial components of various structures, from high-rise buildings to bridges and waterfront developments.

Ground Improvements

Ground improvement plays a crucial role in the success of construction projects, particularly in areas with challenging soil conditions.

Residential Spotlight

House Extensions

We deliver structural design for residential extensions, ensuring safe load transfer and seamless integration with the existing structure.

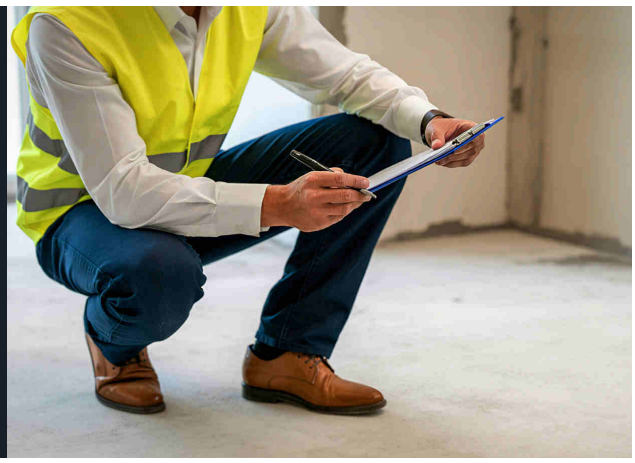

Soil Investigation

We deliver site-specific ground analysis to support safe, efficient, and reliable foundation solutions.

Expert Witness

Detailed & well-supported expert reports that clearly communicate our findings and conclusions, providing comprehensive documentation for legal proceedings.
